A 3D histogram plot representing data from the LDMX experiment. The vertical axis (z-axis) represents the number of events, ranging from 0 to 120. The horizontal axis (x-axis) represents energy in GeV, ranging from 0 to 2000. The depth axis (y-axis) represents a third variable, ranging from 0 to 1.8. The histogram shows a distribution of events, with a peak around 500 GeV and a depth of 1.0. The plot is rendered in a 3D perspective with dotted lines for the hidden edges.
